RESEARCH INTERESTS

AI Trustworthiness, Safety & Security | Applied Cybersecurity (Federated Learning, Adversarial ML) | AI Governance | Responsible AI | Human-Centered & Interpretable AI | Online Misinformation

EDUCATION

University of Lagos, Nigeria

Dec 2024 - Jan 2026

Master of Science, Computer Science – **3.67/5.0 (3.32/4.0 WES iGPA)**

Thesis: *Adversarial Training and Differential Privacy-Enhanced Defense Mechanism for Vertical Federated Learning*

Federal University of Technology, Minna, Nigeria

Jan 2016 – Sep 2021

Bachelor of Technology, Computer Science (Top

First Class (Honors) - 4.62/5.0 (3.77/4.0 WES iGPA)

Thesis: *Classification of Fake COVID-19 Tweets Using Machine Learning Algorithms*

RESEARCH EXPERIENCE

Graduate Research Assistant

University of Lagos

Dec 2025-Present

Principal Investigator: [Professor N.A. Azeez](#)

1. Conducted research conceptualization and literature
2. Conduct research on AI, cybersecurity, privacy-preserving ML, trustworthiness and safety, and IoT security, including literature synthesis, research design, and empirical evaluation
3. Design experimental methodologies and conduct comparative model benchmarking, statistical evaluation, and analysis across security-focused datasets and ML architectures
4. Contributed to 3 peer-reviewed publications on AI in cybersecurity, adversarial training, differential privacy, and IoMT security

Undergraduate Researcher

FUTMinna

Feb 2020-Apr 2022

Supervised by: [Professor John Alhassan](#)

1. Investigated **ML approaches for COVID-19 misinformation detection**, including literature review, model development, and comparative evaluation, resulting in a peer-reviewed publication
2. Led the project group by supporting colleagues with literature reviews, and research methodology design
3. Contributed to a peer-reviewed publication

PEER-REVIEWED PUBLICATIONS

Azeez, N.A., **Malomo, O.S.**, Okerinde, O.M., Ademoye, A.A., Aaron, D.S., Vyver, C.V.D., & Ogbonna, C.E. (2026). Adversarial Training and Differential Privacy-Style Noise Injection for Privacy-Preserving Vertical Federated Learning. *Informatics*, 13(8), 127. <https://doi.org/10.3390/informatics13080127>

Azeez, N.A., Ademoye, A.A., **Malomo, O.S.**, Mary, O.O., Aaron, D.S., & Vyver, C.V. (2026). Investigation of Augmented Datasets for Security in Internet of Medical Things (IoMT) Ecosystems. *Computers*, 15(6), 369. <https://doi.org/10.3390/computers15060369>

Azeez, N. A., **Malomo, O.S.**, Aaron, D.S., Ademoye, A.A., Okerinde, O.M., Otolehi, U.D., & Lukman, O.O. (2025). Artificial Intelligence in Cybersecurity: A Comparative Review of Its Role across the Cyber Kill Chain. *University of IJSLICTR*, 14(1). <https://journals.ui.edu.ng/index.php/uijslictr/article/view/2041>

Malomo, O.S., Uduimoh, A.A., & Alhassan, J.K. (2022). Application of Machine Learning Algorithm for Classification of Fake COVID-19 Tweets. *Journal of Science, Technology, Mathematics and Education (JOSTMED)*, 18(3), 40.

Manuscripts Under Review

Ojerinde, O.A., & Malomo, O.S. (2026). From Data to Diagnosis: Facilitating Physician-AI Synergy in Heart Disease Prediction Systems. *Journal of Engineering and Applied Sciences* (Manuscript Number: JECAS-2026-04-023).

TEACHING EXPERIENCE

Mathematics & Information Technology Instructor

2015-2016

St Michaels Schools, Kontagora

1. Integrated creative teaching strategies with instructional material to make classes engaging and enjoyable for students
2. Tutored over **50 students** in Mathematics and IT, recording **100% class graduation rate** for the academic year
3. Volunteered as the school's IT instructor responsible for training students in computer operations

WORK EXPERIENCE

Cybersecurity Engineer | Data & Research Analyst

Nov 2021- Present

CBC Gedu Technologies, Lagos, Nigeria

1. Implemented secure digital identity and MFA solutions for **top 1%** financial institutions in Nigeria and across 11 Anglophone and Francophone African countries

2. Conducted log analysis for anomaly detection and system performance optimization for both test and production environments, achieving **97% CSAT**
3. Designed interactive data visualization dashboards for reporting key insights to stakeholders
4. Performed research tasks on new and emerging technologies for future investments
5. Generate and renew SSL certificate for 2FA infrastructure for all African subsidiaries of supported banks
6. Performed quarterly health check on 2FA infrastructure across all environments for all subsidiaries

Technical Support & Research Lead

Jun 2026–Present

TrustLock

- Conducted a structured review of existing escrow infrastructure and competing platforms (both academic and commercial) to identify gaps in identity verification, dispute handling, billing and compliance mechanisms
- Provided end-to-end technical support and issue resolution across a live escrow and payments platform, covering dispute resolution, payment failures, tiered fee questions, and account/identity verification.
- Diagnosed and resolved real user-reported issues (failed payments, delayed notifications, verification errors) by tracing them through logs and system behavior
- Designed and administered mixed-method user study System Usability Scale (SUS) and trust-perception survey to evaluate how platform features affected user trust and usability
- Developed and maintained user-facing knowledge base to reduce repeat inquiries and guide users through common issues

SELECTED PROFESSIONAL DEVELOPMENT AND CERTIFICATIONS

Data Science Ethics University of Michigan via Coursera	2026
GenAI Foundations on AWS Masterclass Univasiti x EducationUSA	2026
Explainable AI (XAI) Specialization Duke University via Coursera	2026
Cybersecurity Operations Fundamentals Specialization Cisco via Coursera	2026
exploreCSR: TAU SDGs Summer School Google Research & Thomas Adewumi University	2025

SELECTED COMMUNITY IMPACT & VOLUNTEER EXPERIENCE

Reviewer, [Nigeria Journal of Technological Development \(NJTD\)](#) 2025-Present

Church Data Officer, [RCCG The Envoys](#) 2025-Present

- Created a standardized data repository and Church Management System (ChMS)
- Led a team of 12 volunteers to handle church membership follow-up process on a weekly basis

Registration Team Lead, [Young Ministers' Retreat \(YMR\)](#) 2023-Present

- Led a team of **250 volunteers** to register **200,000+** attendees yearly
- Designed and managed an online accommodation booking platform that processed **6000+** transactions with **98%** success rate and over **₦120,000,000 (\$90K+)** in transaction fees.

Scholastic Aptitude Test Proctor - Proctored 250+ students for a hitch-free SAT experience 2022

Volunteer, EducationUSA Lagos College Fair - Coordinated 1000+ attendees 2022

Class Governor, Department of Computer Science, FUTMINNA 2018-2021

1. Carrying out teaching assistantship positions pro bono
2. Hosted in-person and online seminars and meetings aimed at improving academic performance across the department
Coordinated the distribution of class lecture notes to students
3. Organized 5 crowdfunding initiatives totaling **₦1,500,000 (~\$1,100 USD)**, raising and transparently disbursing to colleagues in need of financial supports towards tuition and upkeep

Vice President, *National Association of Computing Science Students (NACOSS)* 2019-2021

Platoon Leader, National Youth Service Corps (NYSC) 2021

Organized and supervised 120 corp members for various scholarly and social activities including debates, quizzes, cultural and sports competitions within the camp

AWARDS & HONOURS

Federal Ministry of Education Digital Training Academy Scholarship Link	2026
EducationUSA OFP Scholar (Top 1% of 7000 applicants) Link	2022
4x FUTMINNA Vice Chancellor's Scholars Award	2018-2021
4x Deans List Scholar - School of Information & Communication Technology (SICT)	2018-2021
Utiva Data Hackathon Winner (Top 1% of 500+ participants)	2021

TECHNICAL SKILLS

Academic Workflows: Technical Reviewing, Empirical Research Design, Data Augmentation & Synthesis, Manuscript & Grant Writing, Reference Management

Languages: Python, SQL

Frameworks: Pytorch, Tensorflow, Keras, NLP

Developer Tools: Git, VS Code, Linux, Jupyter Lab, Google Colab
